Conclusion

The system shows some connections errors (502 Bad Gateway), pages not found and some functional problems.

The most several problems are related with pages not found because it was not possible any workaround to solve them.

Connections problems cause dissatisfaction on user experience, but could be fixed just refreshing the pages.

The most several functional problems were about:

Bug 1 – It can cause contractual problems.

Bug 5 – Facebook is a great source of data the cannot be ignored.

Bug 7 – Problems on dates can cause synchronization errors, inconsistent data and compliance faults

Bug 23 – Tags are a good way of organizations and data filtering
